Passiflora x violacea

***supplies of most varieties are limited*

Houseplants & Pets

Plants that **may** cause problems

Adenium
Aloe
Crassula
Begonia
Callisia
Euphorbia (caution!)
Hedera
Kalanchoe
Passiflora
Philodendron
Pothos
Sansevieria

Plants considered very safe

Anacampceros
Aeonium
Delosperma
Echeveria
Gasteria
Graptopetalum
Haworthia
Hoya
Peperomia
Pilea
Plectranthus
Portulacaria
Sedum
Schlumbergera
****These are only
partial lists.**

Kingbird Farm

Certified Organic *TROPICALS*

- ◆ Succulents
- ◆ Passion Flowers
- ◆ Houseplants
- ◆ Locally Grown!

CERTIFIED ORGANIC HOUSEPLANTS

WHY ORGANIC?

AT KINGBIRD FARM WE BELIEVE ALL PLANTS SHOULD BE PRODUCED IN A HEALTHY, SUSTAINABLE WAY.

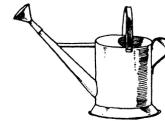

EVEN IF WE DON'T GENERALLY EAT HOUSEPLANTS, THEY SHOULD ALSO BE RAISED WITHOUT CHEMICALS AND SYNTHETIC FERTILIZERS.

OUR PLANTS ARE BEAUTIFUL NATURALLY!

WE PROMISE:

- ◆ COMPOST-BASED POTTING MIX
- ◆ PROPAGATED AND GROWN AT OUR FARM NEAR ITHACA
- ◆ RECYCLED AND REUSED POTS
- ◆ NO HERBICIDES, NEONICOTINOIDS OR OTHER HARMFUL PESTICIDES
- ◆ NO SYNTHETIC GROWTH REGULATORS

Succulent Care

Water: Succulents are water-wise by nature, but that doesn't mean they don't need a good drink now and then. Most succulents should be watered about once a week. Some may need a drink more often if the plant is in a very small pot or placed in a particularly warm location. Succulents, like any other plant, will not survive on a zero-water regimen.

Sun: Most of the plants we sell will be happy in your sunniest windowsill (south- or west-facing). Unless you have a greenhouse, you will be hard-pressed to give them too much sun. We sell some houseplants (*Hoya*, *Philodendron* and spider plants, to name a few) that will also thrive in indirect light. None of our plants will survive in a closet.

Fertilizer: During the growing season (usually summer) you can feed succulents a dilute meal about once a month. A balanced fertilizer that has roughly equal proportions of nitrogen, phosphorous and potassium will work (we use a dilute Neptune's Harvest Fish Emulsion). Do not over-fertilize succulents – they will grow too quickly, which leads to weak, pallid plants.

Our Houseplants

- Aeonium*
- Adenium*
- Agave*
- Aloe*
- Anacampseros*
- Aristolochia*
- Callisia*
- Chlorophytum*
- Crassula*
- Delosperma*
- Dichorandra*
- Duranta*
- Echeveria*
- Euphorbia*
- Gasteria*
- Graptopetalum*
- Haworthia*
- Hoya*
- Kalanchoe*
- Orbea*
- Pelargonium*
- Peperomia*
- Philodendron*
- Pilea*
- Plectranthus*
- Portulacaria*
- Rhipsalis*
- Senecio*
- Stapelia*
- Tradescantia* plus many more!.....

Please note that we are a small grower and every variety may not always be available
